### ABOUT ME

I am pursuing a Bachelor's in Computer Science and Engineering from International Islamic University Chittagong. And I'm very interested in computer vision and deep learning. My thesis focuses on fire classification with (depth-wise) separable convolutions and how we could integrate Inception and attention mechanisms to improve accuracy. Being a Teaching Assistant also comes with mentoring students in and out of the lab. I deeply enjoy sharing my passion for technology with interested, yet curious students. Outside of academics, I help at my full-time job at Excite AI as a Graphic Designer where I design visually appealing content to present on social media and pack into products. My career goal lies in the direction of making a research-focused artificial intelligence and computer science career.

### WORK EXPERIENCE
