ABOUT ME

I am studying Computer Science and Engineering at the International Islamic University Chittagong, specially interested in the field of computer vision and deep learning. In my thesis, I work on fire classification with depth wise separable convolutions along with Inception and attention mechanisms to boost model accuracy. I have a wide range of professional experience in graphic design — I have been professionally a Senior Executive and Graphic Designer at Requin BD, Excite AI to respectively create social media visuals that have had impact, and trained interns. In my role as Secretary of IEEE CS BDC's Web & IT Committee, I coordinate the whole team and lead digital initiatives to augment technical engagement. My career hope is to merge my current AI skill and computer science knowledge into research positions to generate innovation and practical solutions regarding technology. I want to make a research based artificial intelligence and computer science career.
